Cloud Services

TeamLogic IT®
Your Technology Advisor

SHOULD YOU LEVERAGE THE BENEFITS OF CLOUD?

The term "cloud" has gained significant traction with businesses because of the numerous services companies can utilize including storage, redundancy, business applications and many more. And with cloud, applications and important data can be accessed anywhere, anytime, on just about any device. Data is kept current and ubiquitous.

The question is: Is cloud the right solution for you? The answer depends on your needs. TeamLogic IT can help you determine whether various cloud-based solutions are the right choice for your business.

HOW ARE BUSINESSES USING THE CLOUD?

Cloud services come in many forms. Although they originated to solve storage challenges, they now offer businesses a host of options, such as cloud-based email, servers, applications and desktops. TeamLogic IT installs business-grade email that provides encryption, virus protection, data security, effortless synchronization with all devices, and is hosted with companies who have feature-rich platforms with redundancy centers.

ARE CLOUD SERVICES RIGHT FOR MY BUSINESS?

With any technology solution, we weigh the pros and cons against your business requirements. TeamLogic IT will work with you to assess your needs. Our services are focused on building a topflight IT infrastructure for your business that's secure, easy to use, and that provides high availability of your critical data and information when you need it, wherever you may be. And if that means you need "the cloud," then we'll design a solution to take your business there safely with either a public, private or hybrid cloud solution.

CLOUD SOLUTIONS

At TeamLogic IT we offer cloud solutions that cover the following areas:

- *Data Backup/Business Continuity*
- *Hosted VoIP*
- *Desktop-as-a-Service*
- *Applications*
- *Database Servers*
- *Storage*
- *Email*

Turn to TeamLogic IT to help you decide if cloud is the right choice for your business.
