Data Backup and Recovery

TeamLogicIT®
Your Technology Advisor

Data backup and recovery are essential parts of any business operation. Ensuring the ability to quickly recover your data and systems from a crash or disaster is the goal of our data backup and recovery services.

Like most businesses, your data is the backbone of your business. It's an asset that defines your company. Keeping it safe, intact and restorable will give you peace of mind in the face of a catastrophe. As with any important business function, planning and preparation are key and they're essential elements of the quality data backup and recovery services we can provide your organization.

DATA BACKUP: LOCAL OR REMOTE

At TeamLogic IT, our technicians can help you select the right data backup solution that fits your needs and budget. Through local image backup we can backup your operating system, applications, and databases on a regular basis to a server or other onsite backup hardware, making data recovery easier.

Offsite data backup capabilities are available, ranging from nightly file backup to cloud server virtualization. These offsite data backups provide added security in the event of a computer system crash or other facility disaster to get you up and running quickly.

RELIABLE DATA RECOVERY

At TeamLogic IT we provide access to some of the most experienced data recovery specialists in the industry. One of our data recovery partners has one of the fastest standard turnaround times and highest desktop data recovery success rates in the industry. We recover Redundant Array of Independent Disk (RAID) data from all RAID levels from any loss scenario, including multiple drive failures, severe corruption and natural disasters.

LOCAL BACKUP SERVICES

With local image backup you get:

- *Automatic and regular backups so you can focus on other daily tasks*
- *Cost effective and stress-free administration of your data backups*
- *Reports on the status of your daily data backups*
- *Protection for your Windows servers, on-site workstations and mobile computers*

REMOTE BACKUP SERVICES

With remote data backup you get:

- *Offsite backup at a remote facility*
- *Automatic and regular backups so you can focus on other daily tasks*
- *Reduction of outmoded backup devices such as tape, ZIP drives, DVDs or CDs*
- *Military-grade encryption to ensure secure pass phrase recovery*
- *Fast and easy recovery over the Web*
- *Protection for your Windows servers, on-site workstations and mobile computers*

Your data is critical to your business. Let TeamLogic IT handle your data backup and recovery needs.
